As per order

Explore the world of Noorsveld Chicken Farms, a family-owned business in Jansenville, in the heart of the Eastern Cape Karoo, known for its natural resistance to diseases, making it an ideal environment for raising chickens. We are a collective of dedicated chicken farmers who prioritise the well-being of our chickens, staff and environment.

We ensure the wholesome upbringing of our chickens by providing feed free from antibiotics or growth hormones. The result is a delectable, meticulously hand-finished product that not only satisfies your taste buds but also aligns with your commitment to a healthier and more ethical choice for you and your family.

Noorsveld Chicken Farms takes immense pride in our certified free-range chickens. Feel free to request to view our certificate or ask about our farming practices. Our chickens flourish in freedom, raised with access to an external range that allows them to engage in natural behaviours such as foraging, sunbathing and dust bathing.
